Spraceels has abandoned for the present his intention of going to Washington on sugar matters, and will await a summons from some Congressional investigating committee.

"The beet sugar industry is certainly not ready to stand alone," said he, "though in a few years it may be, for improved machinery is all the time lessening the amount of labor required. I believe this country ought to produce all the sugar it user, somewhere near 1,80,500 tons. With the encouragement of the beet sugar industry I believe this will be brought about. We need a bounty for a few years yet."

The prospective increase in the circulation of the National banks will also render some assistance, although this is generally regarded as a mere drop in the bucket. The supply of currency in circulation in the country will be increased during the next few days by the quarterly payment of pensions by \$13,500,000. At Indianapolis \$2,700,000 was paid out yesterday; Louisville, \$1,00,000; Philadelphia, \$1,900,000, and Knoxville, \$1,000,000. It is a curious fact that during the month of July there was an increase in the amount of money in circulation, as shown by the Treasury estimates, of \$17,372,000. July 1 the amount of money of all kinds in circulation was \$1,503,728, 411, while on Aug. 1 it was \$1,611,099,017.

This latter figure is the largest total ever reported on the first of any month, except on June 1, 1892, when it was \$1,615,000,000, it is now \$9,000,000 more than it was a year ago, and the total stack of money in the country is almost
